3M™ Zeta Plus™ Depth Filters

High Performance, Scalable,
Single-Use System

3M™ Zeta Plus™ Encapsulated System

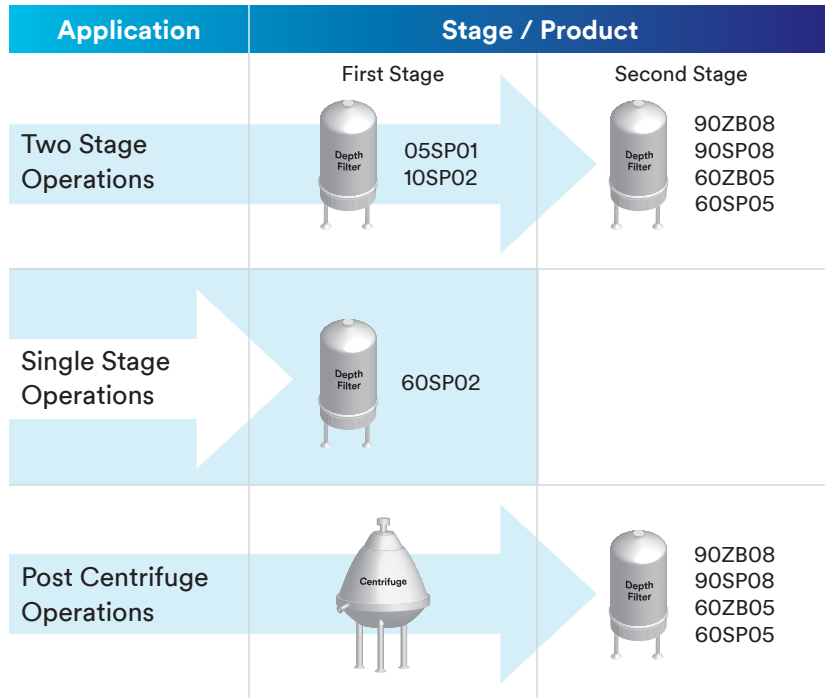

The System of Choice for Single-Use Depth Filtration

High Performance Filter Media

The 3M™ Zeta Plus™ Encapsulated System utilizes the high performing Zeta Plus depth filter series media, including the single and dual layer.

- ▶ Positive charge is capable of reducing negatively charged DNA, endotoxins and other host cell proteins
- ▶ The 3M™ Zeta Plus™ dual layer media enhances the contaminant holding capacity of the filter media. This allows for larger particles to be trapped in the upstream zone of the more open filter media and smaller particles to be trapped in the downstream zone, reducing premature plugging and helping extend service life of the media.
- ▶ Can be used for post fermentation cell culture clarification or downstream impurity removal
- ▶ Can be employed independently or in conjunction with centrifugation or tangential flow filtration (TFF)
- ▶ Activated carbon and lipid removal media also available

3M™ Zeta Plus™ Depth Filter Quick Start Guide

Media Series

SP Media	LA Media	ZB Media
Widest Range	Cleanest	Highly Charged
SP has the widest nominal pore size range relative to other 3M Zeta Plus media offerings, including a greater number of grades as well as grades with larger nominal pore sizes than LA or ZB media.	LA is the cleanest 3M Zeta Plus media family offered. 3M™ Zeta Plus™ LA series low aluminum (LA) filter media are designed to provide low levels of extractables, especially aluminum.	ZB media offers a higher charge level than SP or LA media, and offers single layer and dual layer grades with a smaller nominal pore size than either the SP media family or the LA media family.

Sizing Guide

Pore Size Options: 3M™ Zeta Plus™ SP, LA and ZB Media

Media Family				Application
Grades	SP	ZB	LA	
5	X			Primary
10	X			
30	X	X	X	
50			X	Secondary
60	X	X	X	
90	X	X	X	Centrate
120		X		

For reference only. Retention ratings may vary depending on application.

Features & Benefits

Capsule/Manifold Design

- ▶ Translucent plastic shell (standard capsules, polycarbonate shells)
- ▶ Fully encapsulated shell around solid core
- ▶ Self guiding locking mechanism
- ▶ Lenticular style capsule design
- ▶ Easy detection of the liquid level inside, providing real time monitoring of the filtration process.
- ▶ Eliminates the need for a stainless steel housing and the cleaning step after filtration.
- ▶ Fast and reliable capsule-to-capsule connectivity.
- ▶ Consistency between single-use and conventional depth filtration.

3M™ Zeta Plus™ Filter Media

Model# 16EZB

- ▶ Both single and dual layer Zeta Plus filter media are available.
- ▶ Excellent performance in throughput and filtration efficiency with proper media selection and sizing.
- ▶ The 3M™ Zeta Plus™ Encapsulated System is a single use depth filtration system
- ▶ The complete system is comprised of a holder, two manifolds and the desired number of capsules
- ▶ The polycarbonate capsules feature a translucent shell that allows for easy fluid level observation
- ▶ A self-guiding locking mechanism ensures fast and reliable connections between capsules

3M™ Zeta Plus™ Encapsulated System

The System of Choice for Single-Use Depth Filtration

Ergonomically Designed Large Filter Holders

Traditional depth filtration systems utilize lenticular style cartridge filters and a vertical filtration flow path to allow easy access to process liquids and efficient utilization of filter media. However, stacking cartridges from bottom to top can be cumbersome, and dismantling the spent cartridges is often labor intensive.

Features & Benefits

Ergonomically Designed Holder System

3M™ Encapsulated System Holder, Large (Model #16EZB): holder is pivoted between horizontal and vertical positions

- ▶ Enables loading and unloading at waist height.
- ▶ Central inlets and outlets minimize fluid spills during post use handling.
- ▶ Holder and capsule design allows the combination of multiple 3M Zeta Plus media types or even multiple 3M filtration products in a single holder.
- ▶ Reduced footprint during operation.

Vertical flow path

Recognizing the need for a depth filtration system that is fast, easy and clean, 3M designed filter holders (Model# 16EZB) that can be pivoted between the horizontal position for loading and unloading the capsules and manifolds, and the vertical position for filtration. Allowing loading and unloading at waist height eliminates the need for operators to lift capsules above their heads and reduces the risk of fluid spills when handling spent capsules. The use of the vertical flow path allows for full media utilization and a small system footprint during filtration.

3M™ Encapsulated System Holders, Small (Model# 16EZA)

The small holder is available for laboratory and pilot scale-up studies, in addition to low volume production filtration. The 1-high holder can accommodate from one to four 0.23 m² capsules, or one 1.6 m² (dual layer) or 2.5 m² (single layer) capsule. The 2-high holder can accommodate up to two 1.6 m² (dual layer) or 2.5 m² (single layer) capsules. The 3 high holder can accommodate up to three 1.6 m² (dual layer) or 2.5 m² (single layer) capsules. Either single stage or two-stage depth filtration can be performed within the same holder. The 1-high small holder has a built-in torque limiter that will signal the operator when the holder assembly is properly sealed. All small holders have been designed to be fully autoclavable for applications where that may be required.

3M™ Encapsulated System Holders, Large (Model# 16EZB)

The large holder can accommodate up seven 1.6 m² (dual layer) or 2.5 m² (single layer) capsules. This holder is best suited for use in small to large production scale purification processes. However, this holder can also accommodate a single 1.6 m² (dual layer) or 2.5 m² (single layer) capsule should choose to use it for scale up studies.

Two Stage Operations

For two stage purification operations a second pair of manifolds is required between each stage of multistage operations. Manifold and capsule materials should always be the same.

Figure 1. 3M™ Zeta Plus™ Encapsulated System

Innovative Capsule/Manifold Design

Two capsule configurations are available for use with the 3M™ Zeta Plus™ Encapsulated System.

- ▶ Single cell and multicell capsules are available
- ▶ Single cells have 0.23 m² of filtration media
- ▶ Multicells have 1.6 m² of dual layer media or 2.5 m² of single layer media
- ▶ Alkaline resistant capsules available
- ▶ Dual stage filtration can be performed in the same holder by using an additional set of manifolds

Figure 2. Nominal Retention Ratings for 3M™ Zeta Plus™ Dual Layer Grades

(For reference only. Retention ratings may vary depending on application.)

*Based on testing with 1M NaOH and 5% NaClO (Bleach).

Additional Formats Available

In addition to the 3M™ Zeta Plus™ Encapsulated system, cartridge and sheet options

Zeta Plus Cartridges:

- ▶ Produced in 8 inch, 12 inch and 16 inch sizes
- ▶ Multiple lenticle and construction configurations
- ▶ Dual Layer cartridges are available in SP, ZB and LA media families
- ▶ Stainless steel housings for each size available
- ▶ Uses the same media as encapsulated systems

Scalability

The 3M™ Zeta Plus™ Encapsulated System retains the lenticular filter design and vertical flow path that are characteristics of traditional depth filtration systems. A full range of 3M™ Zeta Plus™ capsules is available from benchtop to production scale, which allows for lab scale, pilot testing and scale-up with the same filtration media.

are also available in most media types and grades.

Zeta Plus Sheets:

- ▶ Available in SP, ZB and LA media families
- ▶ Activated carbon and lipid removal media available on request
- ▶ May be die cut to match specific requirements
- ▶ Designed for use with commercially available filter presses

Contact your local sales rep for additional information about these formats.

Table 2a. 3M™ Zeta Plus™ Laboratory Capsules: Filter Specifications

Intended Use: 3M™ Zeta Plus™ single-use filter products are intended for use in biopharmaceutical processing applications of aqueous and chemical based pharmaceuticals (drugs) and vaccines in accordance with the product instructions and specifications, and cGMP requirements, where applicable. Since there are many factors that can affect a product's use, the customer and user remain responsible for determining whether the 3M product is suitable and appropriate for the user's specific application, including user conducting an appropriate risk assessment and evaluating the 3M product in user's application.

Restricted Use: 3M advises against the use of these 3M products in any application other than the stated intended use(s), since other applications have not been evaluated by 3M and may result in an unsafe or unintended condition. Do not use in any manner whereby the 3M product, or any leachable from the 3M product, may become part of or remains in a medical device that is regulated by any agency, and/or globally exemplary agencies, including but not limited to: a) FDA, b) European Medical Device Directive (MDD), c) Japan Pharmaceuticals and Medical Devices Agency (PMDA) or in applications involving permanent implantation into the body; Life-sustaining medical applications; Applications requiring food contact compliance.

Product Selection and Use: Many factors beyond 3M's control and uniquely within user's knowledge and control can affect the use and performance of a 3M product in a particular application. As a result, end-user is solely responsible for evaluating the product and determining whether it is appropriate and suitable for end-user's application, including completing a risk assessment that considers the product leachable characteristics and its impact on drug safety conducting a workplace hazard assessment and reviewing all applicable regulations and standards (e.g., OSHA, ANSI, etc.). Failure to properly evaluate, select, and use a 3M product and appropriate safety products, or to meet all applicable safety regulations, may result in injury, sickness, death, and/or harm to property.

Warranty, Limited Remedy, and Disclaimer: Unless a different warranty is specifically stated on the applicable 3M product packaging or product literature (in which case such warranty governs), 3M warrants that each 3M product meets the applicable 3M product specification at the time 3M ships the product. 3M MAKES NO OTHER WARRANTIES OR CONDITIONS, EXPRESS OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, ANY IMPLIED WARRANTY OR CONDITION OF MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE, OR ARISING OUT OF A COURSE OF DEALING, CUSTOM, OR USAGE OF TRADE. If a 3M product does not conform to this warranty, then the sole and exclusive remedy is, at 3M's option, replacement of the 3M product or refund of the purchase price.

Limitation of Liability: Except for the limited remedy stated above, and except to the extent prohibited by law, 3M will not be liable for any loss or damage arising from or related to the 3M product, whether direct, indirect, special, incidental, or consequential (including, but not limited to, lost profits or business opportunity), regardless of the legal or equitable theory asserted, including, but not limited to, warranty, contract, negligence, or strict liability.
